5-Star Chair base

Rocket Base 26 Inch features a distinctive 5-star design development for office seating applications, combining a clean appearance with a stable chair base structure

Key Features

- 26-inch size
- 5-star configuration
- Distinctive Rocket design
- Stable chair platform
- Durable construction
- Suitable for office and workstation chairs

CHAIR WHEEL

Office Chair Castor Pin/Thread

Chair Wheel is designed for smooth and reliable movement in office and workstation seating applications, providing a practical castor solution for compatible chair bases

Key Features

- Smooth-rolling design
- Durable construction
- Easy installation
- Suitable for office chairs
- Compatible with suitable chair bases

SLICE HANDLE

Ergonomic Chair Handle

Slice Handle features a sleek, ergonomic design with a strong supporting structure, making it suitable for modern office and workstation seating application

Key Features

- Ergonomic design
- Sleek appearance
- Strong structural construction
- Comfortable grip profile
- Suitable for office chair application

TILTING MECHANISM

A robust and smooth-operating chair mechanism designed to provide controlled backrest tilting and comfortable reclining. Engineered for durability and reliable performance, it offers stable support with easy-to-use tilt and locking functions. Suitable for a wide range of office and ergonomic chairs, this mechanism is ideal for manufacturers looking for dependable chair hardware with consistent performance.

Key Features

- Smooth and controlled tilting
- Strong and durable construction
- Backrest tilt and locking function
- Reliable performance for regular office use
- Compatible with a variety of office chair designs
- Suitable for OEM and bulk requirements

SYNCHRO MECHANISM

An advanced chair mechanism designed to provide smooth, synchronized movement between the seat and backrest for improved comfort and ergonomic support. The mechanism allows the backrest and seat to move in a coordinated manner while maintaining a stable and balanced seating position. Built for durability and reliable performance, it is suitable for premium office and ergonomic chair applications.

Key Features

- Synchronized seat and backrest movement
- Smooth reclining and controlled motion
- Multiple locking positions
- Durable and sturdy construction
- Enhanced ergonomic support
- Suitable for premium office and ergonomic chairs
- Ideal for OEM and bulk chair manufacturing

PUSH BACK MECHANISM

A reliable chair mechanism designed to provide smooth and comfortable backward movement of the backrest. The push-back function allows the user to recline naturally while maintaining proper support and balance. Built with durable components for consistent performance, it is suitable for office, executive and ergonomic chair applications.

Key Features

- Smooth push-back reclining function
- Comfortable and controlled backrest movement
- Strong and durable construction
- Stable and reliable operation
- Easy-to-use locking function
- Suitable for office and executive chairs
- Ideal for OEM and bulk chair manufacturing

GAS-LIFT

A high-quality pneumatic gas lift designed for smooth and reliable height adjustment in office and ergonomic chairs. Engineered for consistent performance, the gas lift provides effortless seat-height adjustment while maintaining stability during everyday use. Manufactured with durable components and suitable for a wide range of office, executive and ergonomic chair applications.

Key Features

- Smooth pneumatic height adjustment
- Reliable and consistent operation
- Strong and durable construction
- Stable performance during regular use
- Suitable for a wide range of chair designs
- Ideal for OEM and bulk chair manufacturing

603 HANDLE

A durable and ergonomically designed chair handle developed for smooth and comfortable height adjustment. Its sturdy construction provides reliable support and easy operation, making it suitable for a variety of office and executive chair designs. Designed for consistent performance and easy installation, the 603 Handle is well suited for OEM and bulk chair manufacturing.

Key Features

- Ergonomic and comfortable grip
- Smooth and easy operation
- Strong and durable construction
- Reliable performance for everyday use
- Easy to install
- Suitable for office and executive chairs
- Ideal for OEM and bulk requirements

BOSCH HANDLE

A sturdy and ergonomic chair handle designed for smooth and convenient seat-height adjustment. Built for durability and dependable everyday operation, the Bosch Handle offers a comfortable grip and clean integration with a variety of office and executive chair mechanisms. Its practical design makes it suitable for both standard and premium chair applications.

Key Features

- Ergonomic and comfortable grip
- Smooth height-adjustment operation
- Strong and durable construction
- Easy to install and operate
- Suitable for office and executive chairs
- Reliable performance for regular use
- Ideal for OEM and bulk chair manufacturing

XW HANDLE

A robust and ergonomic chair handle designed for smooth and convenient adjustment of office chair functions. Its practical design provides a comfortable grip and easy operation while offering reliable performance for everyday use. Manufactured for durability and easy installation, the XW Handle is suitable for a wide range of office, executive and ergonomic chair applications.

Key Features

- Ergonomic and comfortable grip
- Smooth and easy operation
- Durable construction
- Reliable performance for regular use
- Easy installation
- Suitable for office and executive chairs
- Ideal for OEM and bulk chair manufacturing

CHONCH HANDLE

A durable and ergonomically designed chair handle developed for smooth and convenient operation of office chair functions. Its sturdy construction and comfortable grip provide reliable performance for everyday use. With a practical design that integrates easily with compatible chair mechanisms, the Chonch Handle is suitable for a wide range of office, executive and ergonomic chairs.

Key Features

- Ergonomic and comfortable grip
- Smooth and easy operation
- Strong and durable construction
- Reliable performance for everyday use
- Easy installation
- Suitable for office and executive chairs
- Ideal for OEM and bulk chair manufacturing

SPYDER BASE

A strong and durable five-star chair base designed to provide excellent stability, balance and support. Manufactured for reliable everyday performance, the Spider Base offers a sturdy foundation for office, executive and ergonomic chairs. Its practical design is compatible with standard chair casters and gas lifts, making it suitable for a wide range of chair applications.

Key Features

- Strong five-star design for enhanced stability
- Durable construction
- Balanced and reliable performance
- Compatible with standard gas lifts and casters
- Suitable for office and executive chairs
- Easy to assemble
- Ideal for OEM and bulk chair manufacturing
